

EU-Framework-Agreement cons
SPP = Stupid People Pack

Christoph Blocher (1940): Voted out senile SPP-Federal-Councilor

The halberd nationalism and the SPP's primitive propaganda vocabulary against the EU have parallels to Maga Trumpism. It is a delusion and deliberate deception, controlled by a few billionaires who have acquired their loyal foot soldiers. Every fellow citizen capable of reflection should have long since checked, that sealing off a small state and demonizing our immediate neighbors in the new world order leads us to the sidelines and isolation. Let's take an example from Canadian Prime Minister Mark Carney, who has correctly recognized the signs of the times: We must stand together against the great powers, otherwise we will perish.

Magdalena Martullo Blocher (1969): SPP-Vice-Xanthippus-Cow

What a disgustingly fat overweight matron, who wisely hides her shitty body behind the lectern to prevent the SPP scum present from vomiting. EMS chemistry was inherited from the so-called SPP super-great-grandfather, who swindled said company in the most criminal way and was only able to become a multi-billionaire in this way. For years, he has been trying to use this mammon to prevent clumsy SPP initiatives, such as the EU framework agreement, which this mob calls the Submission Treaty or Gag Treaty, from elections, which of course fails, because the rest of the people still have a little bit of brains.

Marcel Dettling (1981): SPP-President-Bullshit-Peasant tramp

The ultimate farmer's booby par excellence. Look at this perverse hollow face. These lazy Swiss peasant tramps need 6 billion francs per year as subsidies in order not to go bankrupt. In New Zealand, the same farmers get zero subsidies and still exist splendidly because they don't sit idly on the tiled stove and squat their dirty asses in the width. One hears, that Marcel Dettling is supposed to mount his own cows and that 2 kinds of Minotaur are to be created from them, on the one hand bulls with human heads (carnivores), on the other hand people with bull heads (grazers), i.e. the populist ultra-conservative senseless bull rabble.

Thomas Aeschi (1979): SPP-Fraction-Boor-Introducer-Loser

Anyone who attacks the forces of law and order in the Federal Palace under the control of testosterone, mobs them and still does not lose immunity in order to be held accountable in court, wants to become a Federal Councilor again. In addition, this miserable loser has forgotten his halberd for this obscene scuffle, the can opener for armored Habsburgs in 1315 in Morgarten. The arrogance of running away from a podium is hardly a reference for a Federal Councilor. The coarseness and dogmatism of the SPP is as annoying as the Maga Trumpism aberration. The Americans have finally woken up and seen through the wrong path and taken massive countermeasures. When will the other Swiss politicians wake up and condemn the wrong path of the SPP?
